Stimulus Control of Behavior

Measurement of Stimulus Control
  Stimulus generalization gradients
  Stimulus generalization and stimulus discrimination
  Contrasting conceptions of stimulus generalization

Determinants of Stimulus Control: Sensory and Motivational Variables
  Sensory capacity
  Sensory orientation
  Stimulus intensity or salience
  Motivational factors

Determinants of Stimulus Control: Learning Factors
  Pavlovian and instrumental conditioning
  Stimulus discrimination training
  Multiple schedules of reinforcement

Determinants of the Precision of Stimulus Control
  Interdimensional versus intradimensional discriminations

Stimulus Equivalence Training
