
Correction to the Special Section on Comorbidity and Treatment Implications

There was a serious omission to the December 1992 issue of the *Journal of Consulting and Clinical Psychology* (Vol. 60, No. 6, pp. 833–908).

John F. Clarkin was co-editor of the special section on comorbidity, which appeared in the December issue. His name did not appear in the special section heading in the table of contents, although he was listed as co-author of the introduction and summary. A corrected listing of the special section contents is shown below. The production office deeply regrets the error.
