Spatial invalid	Right	2	286	(55)	270	(44)	296	(36)	282	(36)

^a*n* = 8. ^b*n* = 15. ^c*n* = 16.

Note. CTI = Cue-Target Interval (ms; see Figure 2).

Supplementary Table III. Significant Time \times Group interactions.

Paradigm	Test	Comparison	<i>F</i>	<i>df</i>	<i>p</i>	ω^2	Interpretation
<i>Dual Attention to Response Task (DART)</i>							
Grey digit RT	ANCOVA	MBSR <i>vs.</i> NOCO <i>vs.</i> INCO <i>vs.</i> NMSR	4.77	46	.006	.14	Group changes differed overall
Grey digit RT	ANCOVA	MBSR <i>vs.</i> INCO	12.70	24	.002	.24	INCO improved more than MBSR.
<i>Spatial and Temporal Attention Network task (STAN)</i>							
Neutral trials RT	ANCOVA	MBSR <i>vs.</i> (NMSR + MBSR)	5.94	39	.016	.05	INCO improved more than the stress reduction groups combined.
Temporal invalid trials	ANOVA	NMSR <i>vs.</i> NOCO	5.28	23	.032	.13	NMSR improved more than NOCO
<i>D2-test of attention</i>							
Error distribution ^a	ANOVA	MBSR <i>vs.</i> NOCO <i>vs.</i> INCO <i>vs.</i> NMSR	2.73	92	.028	-	Group changes differed overall
Error distribution ^a	ANOVA	MBSR <i>vs.</i> NOCO	3.21	46	.050	-	MBSR improved Section 2 more than NOCO.
Error distribution ^a	ANOVA	MBSR <i>vs.</i> CICO	3.13	62	.051	-	MBSR improved Section 2 more than CICO.
Error distribution ^a	ANOVA	MBSR <i>vs.</i> NMSR	7.03	62	.004	-	MBSR improved Section 2 more than NMSR.
<i>Theory of Visual Attention test (TVA)</i>							
Perceptual threshold	ANCOVA	MBSR <i>vs.</i> NOCO	4.95	24	.037	.04	MBSR improved more than NOCO.
Perceptual threshold	ANCOVA	MBSR <i>vs.</i> CICO	6.21	32	.019	.04	MBSR improved more than CICO.
Working memory capacity	ANCOVA	MBSR <i>vs.</i> CICO	5.11	32	.032	.05	MBSR improved more than CICO.
<i>Cortisol secretion</i>							
AUC – Ground	ANCOVA	MBSR <i>vs.</i> CICO	7.50	26	.012	.14	MBSR decreased more than CICO.
<i>Mindfulness Attention and Awareness Scale (MAAS)</i>							
Overall mindfulness	ANCOVA	MBSR <i>vs.</i> CICO	6.81	29	.015	.09	MBSR increased more than CICO.
<i>Cohen's Perceived Stress Scale (PSS)</i>							
Overall stress score	ANCOVA	MBSR <i>vs.</i> CICO	5.64	29	.025	.11	MBSR decreased more than CICO.

^a. Time \times Group \times Section interaction. No effect size is provided due to the complexity of interpreting such an effect (see "Data Analyses").

Note. *p*-values are two-tailed and uncorrected for multiple comparisons (see text for Bonferroni-corrected *p*-values).

SUPPLEMENTARY FIGURES

Supplementary Figures. *S1.* Pre-post group changes on the grey digit CV in DART. No groups improved significantly, and no Time \times Group interactions were significant. *S2.* Pre-post group changes on the CV for neutrally cued trials in STAN. No groups improved significantly, and no Time \times Group interactions were significant. Error bars represent one standard error of the mean.
