

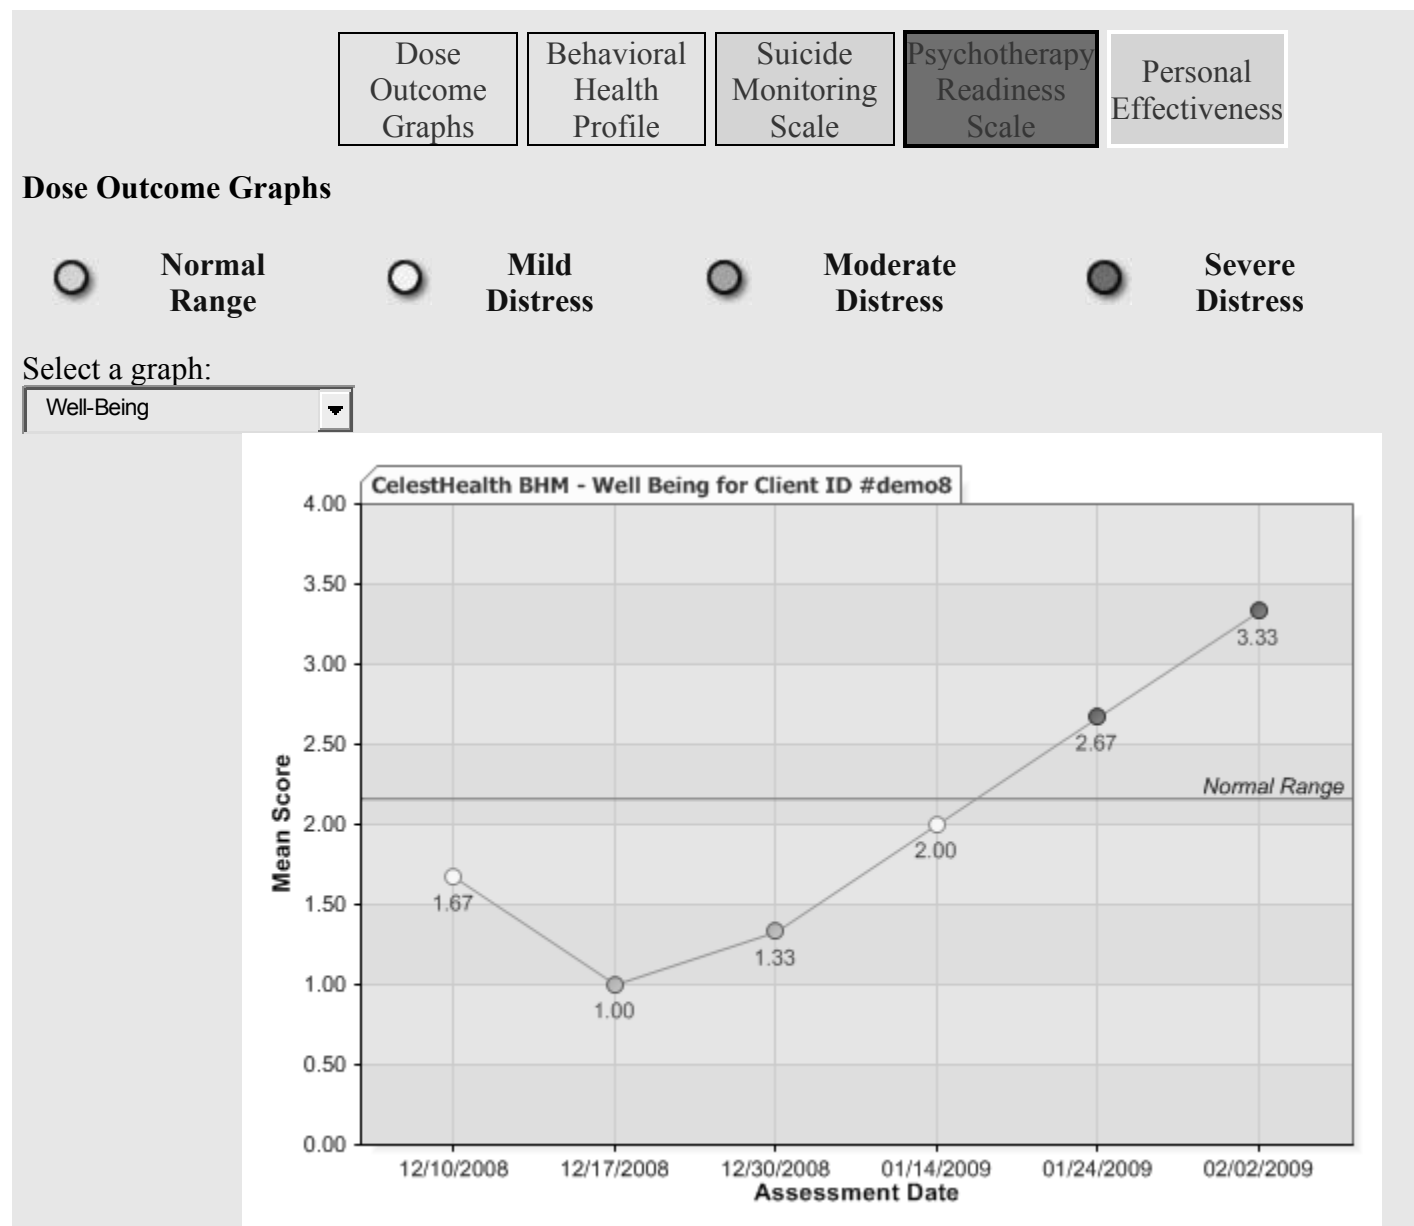

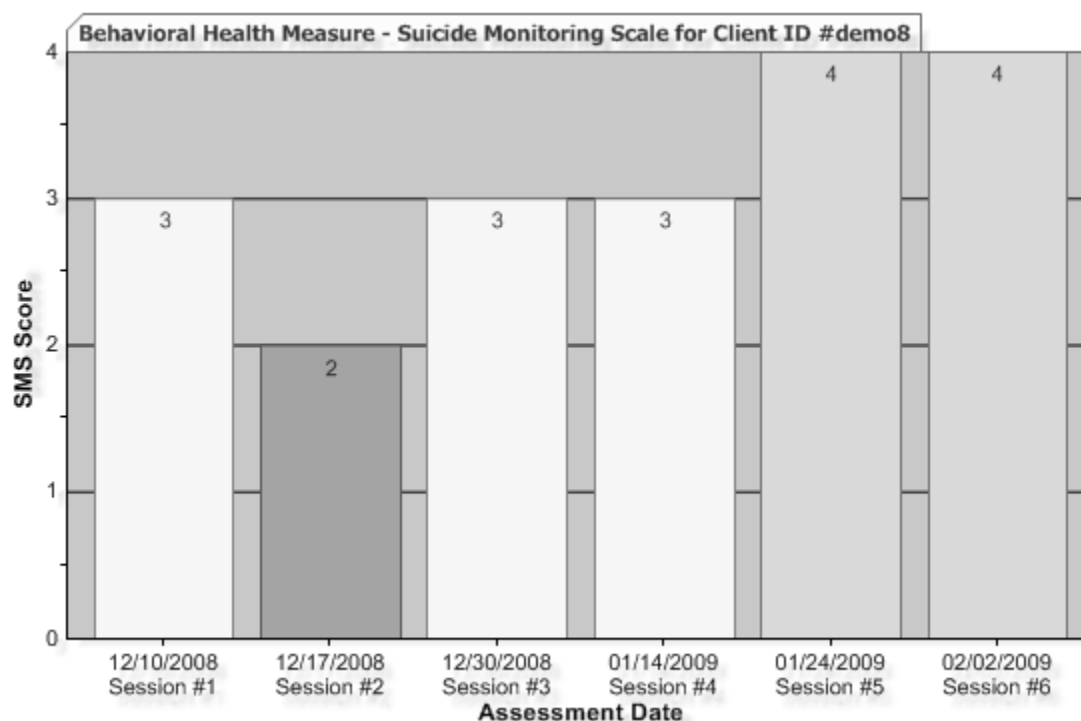

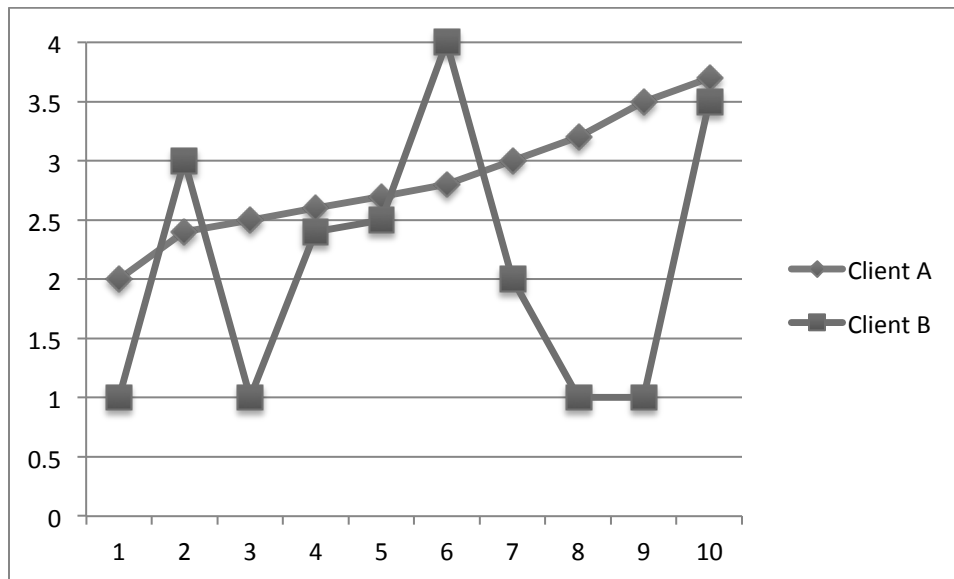

Figure 1. Dose Outcome Graph for Fictitious Client**CELESTHEALTH CLINICAL REPORT****Client ID#: demo8 - 2/2/2009**

Figure 2. Suicide Monitoring Scale**Session Interpretations**

	RED-HIGH RISK (Score = 1). The client indicates a high level of suicidality and should be monitored closely. A higher level of care and/or consultation with other clinicians should be considered.
	ORANGE-MODERATE RISK (Score = 2). The client indicates a moderate level of suicidality. Client should be monitored closely. Clinician should discuss discrepancy between "thoughts" and "risk" items on BHM suicide scale. Consultation with other mental health professionals should be considered.
	YELLOW-LOW RISK (Score = 3). Client indicates a low level of suicidality. Client should be monitored.
	GREEN-NO INDICATION OF RISK (Score = 4). Client indicates no suicidality.

Figure 3.**CELESTHEALTH ADMINISTRATIVE REPORT**

	<u>Number of Clients</u>	<u>% of Clients</u>
TOTAL NUMBER OF CLIENTS ASSESSED AT INTAKE	46	100%
AVERAGE NUMBER OF BHM ADMINISTRATIONS FOR CLIENTS ASSESSED AT INTAKE	3.61	
Percentages/Averages for Major Scales Based on the Most Recent Session		
Clients included in these calculations are those who entered psychotherapy in the distressed (i.e., Mild, Moderate, Severe) range except for Deteriorated clients where all clients are included. Improved clients include those clients who also Recovered.		
<u>Global Mental Health - Based on 18 Clients</u>		
Recovered	9	50.00%
Improved	12	66.67%
Unchanged	5	27.78%
Deteriorated	3	6.52%
Average Intake Score	2.01	
Average Most Recent Score	2.59	
<u>Anxiety - Based on 17 Clients</u>		
Recovered	9	52.94%
Improved	13	76.47%
Unchanged	3	17.65%
Deteriorated	2	4.35%
Average Intake Score	1.78	
Average Most Recent Score	2.44	
<u>Depression - Based on 19 Clients</u>		
Recovered	8	42.11%
Improved	12	63.16%
Unchanged	4	21.05%
Deteriorated	4	8.70%
Average Intake Score	1.81	
Average Most Recent Score	2.39	
<u>Suicide - Based on 8 Clients</u>		
Recovered	3	37.50%
Improved	5	62.50%
Unchanged	3	37.50%
Deteriorated	3	6.52%
Average Intake Score	1.63	
Average Most Recent Score	2.5	

Figure 4.**Two Fictitious Clients Trajectories Over the Course of Treatment**

Notes. The horizontal axis represents the number of sessions. The vertical axis represents scores on the GMH with a scale ranging from 0 to 4.

Figure 5.**Racial/Ethnic Disparities in Psychotherapists Caseloads by Percentage of Reliable****Clinically Significant Change**

Notes. The vertical axis represents the percentage of clients who reached reliable and clinically significant change. REM = Racial/ethnic minorities.
