

Acknowledgment

More than a century after its first volume, the articles published in the *Journal of Abnormal Psychology* continue to set the gold standard for understanding abnormal behavior. The manuscripts comprising the pages of the Journal represent a small fraction of the work put forth by dedicated scientists who submit their best work in hopes of furthering the understanding of psychopathology. The Journal would not be able to maintain its position as the premier outlet for psychopathology research without the gracious contributions of our board members, reviewers, guest editors, and authors—and for that we extend our thanks.

The editor and associate editors wish to thank the following persons who reviewed manuscripts on an ad hoc basis between September 5, 2019 and August 28, 2020.
