

VOL. 14 SUBJECT INDEX

A

academic reputations, 175–178
 adult psychopathology, 329–352
 affective social competence, 402–406
 alcohol use disorder, 39–57
 assessment, 99–102
 awareness, 414–421
 Axis II, 99–102
 Axis II pathology, 77–93

B

behavior therapy, 268–273, 279–282
 boulder model, 172–174

C

cautions in interpreting research, 213–218
 child, 124–143
 children, 149–156, 179–212
 children and adolescents, 219–223
 child treatment, 358–371
 citations, 175–178
 classification, 94–98
 clinical psychology, 1–5, 157–171
 clinical training, 172–174
 cognitive-behavioral therapy, 34–38
 cognitive mediation, 224–239, 247–251
 cognitive processes, 224–239, 247–251
 cognitive therapy, 224–239, 240–243, 244–246, 353–357
 community mental health, 304–305
 community psychology, 304–305
 comorbidity, 1–5, 6–19, 20–22, 39–57, 64–69, 70–76
 confirmatory factor analysis, 103–105
 context, 422–428
 co-occurring disorder, 64–69
 coping, 149–156
 critical incident stress debriefing, 106–116

Critical Incident Stress Debriefing, 121–123

Critical Incident Stress Management, 121–123

criticisms, 279–282
 culture, 6–19

D

debriefing, 117–120
 depression, 240–243, 244–246
 development, 6–19
 diagnosis, 99–102
 dimensional, 94–98
 disasters, 179–212, 219–223
 dissemination, 268–273
 dual diagnosis, 20–22, 23–33, 34–38, 58–63
 dual disorder, 64–69
 dual disorders, 20–22

E

early intervention, 106–116
 education and training, 157–171
 emergency services, 106–116
 emotion, 307–322, 323–328, 329–352, 353–357, 372–376, 402–406, 407–413, 414–421, 422–428
 emotional awareness, 307–322
 emotional expression, 307–322
 emotion assessment, 377–401
 emotion-based assessment, 407–413
 emotion-based treatment, 329–352, 407–413
 emotion recognition, 407–413
 emotion regulation, 307–322, 323–328, 329–352, 377–401, 402–406, 407–413, 422–428
 emotion theory, 358–371
 ethics, 117–120

evidence-based treatment, 252–267, 407–413

F

factor analysis, 77–93
 faculty, 157–171
 flexibility, 422–428
 function, 402–406

G

graduate training, 299–303

H

health, 1–5
 HIV/AIDS, 23–33, 34–38

I

illness, 149–156
 information, 124–143
 intervention, 219–223

M

measurement, 240–243, 402–406
 mechanisms of change, 240–243, 244–246
 media, 179–212
 medical, 149–156
 medical distress, 144–148
 medical procedure, 124–143
 mental health services, 283–298
 mental illness, 20–22
 methodology, 377–401
 motivational interventions, 39–57
 motivational interviewing, 58–63

P

pain, 124–143
 pediatric, 144–148
 personality, 94–98, 103–105
 personality diagnosis, 77–93

personality disorder, 94–98, 99–102, 103–105
 personality disorders, 77–93
 personality pathology, 99–102
 preparation, 124–143, 144–148, 149–156
 prevention, 34–38, 372–376
 procedural pain, 144–148
 process, 402–406
 program evaluation, 157–171
 program rankings, 172–174
 psychological debriefing, 106–116, 121–123
 psychological science, 20–22
 psychologists, 283–298
 psychopathology, 6–19
 psychosocial treatment, 252–267
 psychotherapy, 224–239, 247–251, 353–357
 psychotherapy integration, 407–413
 psychotherapy research, 244–246, 323–328
 PTSD, 117–120, 179–212
 publication rates, 175–178

R

rankings, 175–178

rebound, 279–282
 regulation, 414–421
 relational, 414–421
 research, 117–120, 358–371
 research priorities, 213–218
 research progress, 240–243
 rural, 304–305
 rural environments, 283–298
 rural mental health, 299–303
 rural psychology, 299–303, 304–305

S

schizophrenia, 58–63, 64–69
 schizophronia, 39–57
 scholarly productivity, 157–171
 science and practice, 172–174
 scientist–practitioner, 172–174
 scientist–practitioner gap, 244–246
 secondhand terrorism, 179–212
 serious mental illness, 70–76
 severe mental illness, 23–33, 64–69
 sexual risk behavior, 23–33
 social anxiety, 103–105
 structure, 402–406
 substance abuse, 23–33, 64–69, 70–76
 substance use, 1–5
 substance use disorder, 1–5, 20–22

substance use disorders, 58–63
 symptom substitution, 279–282

T

telehealth, 299–303
 terrorism, 179–212, 213–218, 219–223
 terrorist attacks, 219–223
 tic disorders, 252–267
 tics, 268–273, 274–278
 tic suppression, 279–282
 Tourette, 279–282
 Tourette syndrome, 252–267, 268–273, 274–278
 training, 1–5, 6–19, 175–178
 transformation, 414–421
 trauma, 106–116
 traumatic stress, 106–116
 treatment, 6–19, 70–76, 268–273, 372–376
 treatment outcome, 274–278

U

unified treatment, 422–428

V

Veterans Affairs treatment, 299–303
