

Supplemental Materials for Maternal Psychological Control and Mother-Adolescent Conflict Discussion Quality: Different
Perceptions are Key

Supplemental Materials Figure 1

Path Analysis with Interaction between Adolescent Perceived and Observed Psychological Control Predicting Discussion Quality

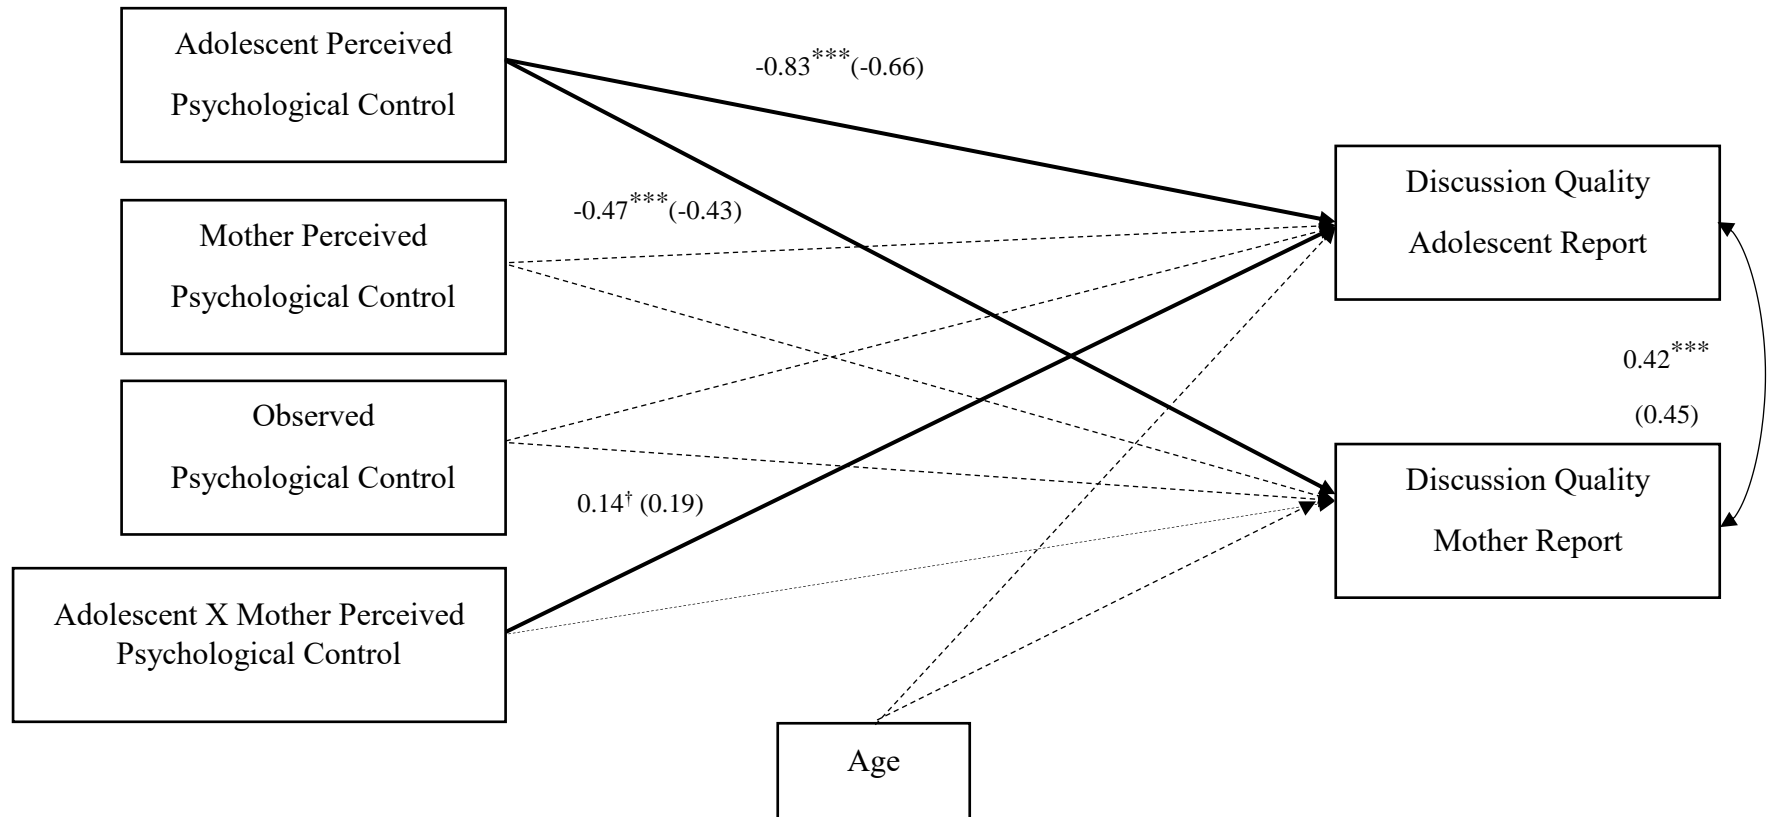

Note. Dashed lines represent non-significant paths. Covariances among exogenous variables are present but not shown. Numbers prior to parentheses represent unstandardized path coefficients; numbers within parentheses represent standardized path coefficients.

* $p < .05$, ** $p < .01$, *** $p < .001$.

Supplemental Materials Figure 2

Path Analysis with Interaction between Adolescent and Mother Perceived Psychological Control Predicting Discussion Quality

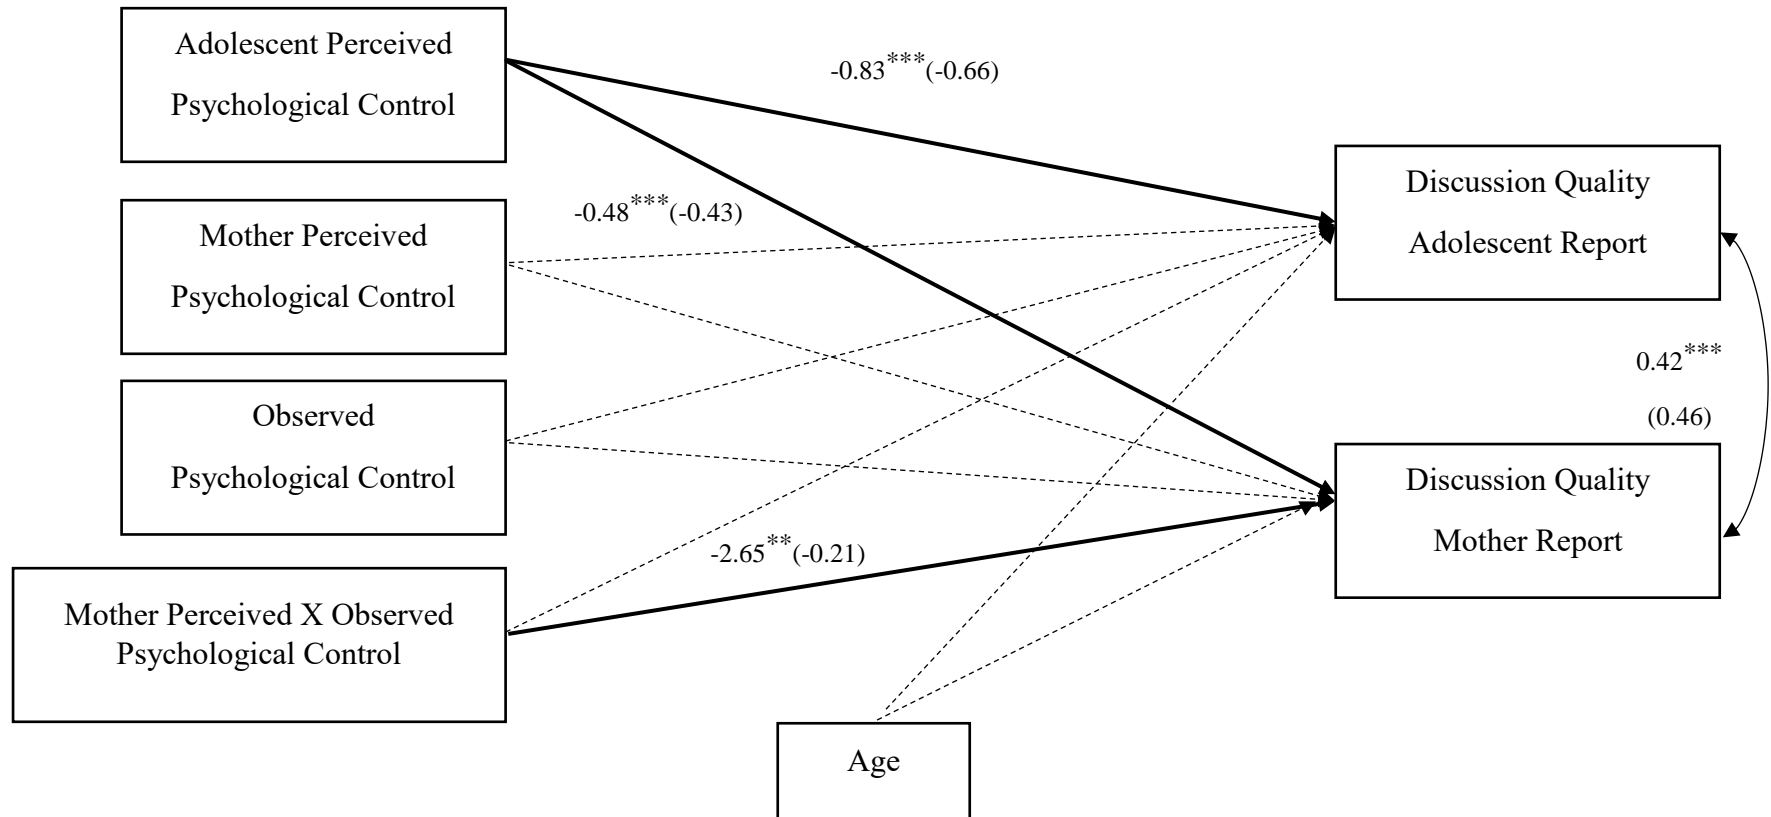

Note. Dashed lines represent non-significant paths. Covariances among exogenous variables are present but not shown. Numbers prior to parentheses represent unstandardized path coefficients; numbers within parentheses represent standardized path coefficients.

$^{\dagger} p < .10$, $^* p < .05$, $^{**} p < .01$, $^{***} p < .001$.

Supplemental Materials Figure 3

Path Analysis with Interaction between Mother Perceived and Observed Psychological Control Predicting Discussion Quality

Note. Dashed lines represent non-significant paths. Covariances among exogenous variables are present but not shown. Numbers prior to parentheses represent unstandardized path coefficients; numbers within parentheses represent standardized path coefficients.

* $p < .05$, ** $p < .01$, *** $p < .001$.
