1. Data

A. Study _____ (Select One)
   o   I agree to make the data available in a trusted open-access repository.
   o   I agree to make some, but not all, of the data available in a trusted open-access repository.
   o   The data will not be available.

B. Study _____ (Select One)
   o   I agree to make the data available in a trusted open-access repository.
   o   I agree to make some, but not all, of the data available in a trusted open-access repository.
   o   The data will not be available.

C. Study _____ (Select One)
   o   I agree to make the data available in a trusted open-access repository.
   o   I agree to make some, but not all, of the data available in a trusted open-access repository.
   o   The data will not be available.

D. Study _____ (Select One)
   o   I agree to make the data available in a trusted open-access repository.
   o   I agree to make some, but not all, of the data available in a trusted open-access repository.
   o   The data will not be available.

E. Study _____ (Select One)
   o   I agree to make the data available in a trusted open-access repository.
   o   I agree to make some, but not all, of the data available in a trusted open-access repository.
   o   The data will not be available.

F. Study _____ (Select One)
   o   I agree to make the data available in a trusted open-access repository.
   o   I agree to make some, but not all, of the data available in a trusted open-access repository.
   o   The data will not be available.

G. Study _____ (Select One)
   o   I agree to make the data available in a trusted open-access repository.
   o   I agree to make some, but not all, of the data available in a trusted open-access repository.
   o   The data will not be available.

H. Study _____ (Select One)
   o   I agree to make the data available in a trusted open-access repository.
   o   I agree to make some, but not all, of the data available in a trusted open-access repository.
   o   The data will not be available.

I. Study _____ (Select One)
   o   I agree to make the data available in a trusted open-access repository.
   o   I agree to make some, but not all, of the data available in a trusted open-access repository.
   o   The data will not be available.

2. Data analytic methods and code

A. Study ____ (Select One)
- o I agree to make the data analytic methods and code available in a trusted open-access repository.
- o I agree to make some, but not all, of the data analytic methods and code available in a trusted open-access repository.
- o The data analytic methods and code will not be available.

B. Study ____ (Select One)
- o I agree to make the data analytic methods and code available in a trusted open-access repository.
- o I agree to make some, but not all, of the data analytic methods and code available in a trusted open-access repository.
- o The data analytic methods and code will not be available.

C. Study ____ (Select One)
- o I agree to make the data analytic methods and code available in a trusted open-access repository.
- o I agree to make some, but not all, of the data analytic methods and code available in a trusted open-access repository.
- o The data analytic methods and code will not be available.

D. Study ____ (Select One)
- o I agree to make the data analytic methods and code available in a trusted open-access repository.
- o I agree to make some, but not all, of the data analytic methods and code available in a trusted open-access repository.
- o The data analytic methods and code will not be available.

E. Study ____ (Select One)
- o I agree to make the data analytic methods and code available in a trusted open-access repository.
- o I agree to make some, but not all, of the data analytic methods and code available in a trusted open-access repository.
- o The data analytic methods and code will not be available.

F. Study ____ (Select One)
- o I agree to make the data analytic methods and code available in a trusted open-access repository.
- o I agree to make some, but not all, of the data analytic methods and code available in a trusted open-access repository.
- o The data analytic methods and code will not be available.

G. Study ____ (Select One)
- o I agree to make the data analytic methods and code available in a trusted open-access repository.
- o I agree to make some, but not all, of the data analytic methods and code available in a trusted open-access repository.
- o The data analytic methods and code will not be available.

H. Study ____ (Select One)
- o I agree to make the data analytic methods and code available in a trusted open-access repository.
- o I agree to make some, but not all, of the data analytic methods and code available in a trusted open-access repository.
- o The data analytic methods and code will not be available.

I. Study ____ (Select One)
- o I agree to make the data analytic methods and code available in a trusted open-access repository.
- o I agree to make some, but not all, of the data analytic methods and code available in a trusted open-access repository.
- o The data analytic methods and code will not be available.

3. Research materials

A. Study _____ (Select One)
   o   I agree to make the research material available in a trusted open-access repository.
   o   I agree to make some, but not all, of the research material available in a trusted open-access repository.
   o   The research material will not be available.

B. Study _____ (Select One)
   o   I agree to make the research material available in a trusted open-access repository.
   o   I agree to make some, but not all, of the research material available in a trusted open-access repository.
   o   The research material will not be available.

C. Study _____ (Select One)
   o   I agree to make the research material available in a trusted open-access repository.
   o   I agree to make some, but not all, of the research material available in a trusted open-access repository.
   o   The research material will not be available.

D. Study _____ (Select One)
   o   I agree to make the research material available in a trusted open-access repository.
   o   I agree to make some, but not all, of the research material available in a trusted open-access repository.
   o   The research material will not be available.

E. Study _____ (Select One)
   o   I agree to make the research material available in a trusted open-access repository.
   o   I agree to make some, but not all, of the research material available in a trusted open-access repository.
   o   The research material will not be available.

F. Study _____ (Select One)
   o   I agree to make the research material available in a trusted open-access repository.
   o   I agree to make some, but not all, of the research material available in a trusted open-access repository.
   o   The research material will not be available.

G. Study _____ (Select One)
   o   I agree to make the research material available in a trusted open-access repository.
   o   I agree to make some, but not all, of the research material available in a trusted open-access repository.
   o   The research material will not be available.

H. Study _____ (Select One)
   o   I agree to make the research material available in a trusted open-access repository.
   o   I agree to make some, but not all, of the research material available in a trusted open-access repository.
   o   The research material will not be available.

I. Study _____ (Select One)
   o   I agree to make the research material available in a trusted open-access repository.
   o   I agree to make some, but not all, of the research material available in a trusted open-access repository.
   o   The research material will not be available.
